

CMS WORKSHOP LECTURES

Volume 18

**MATERIALS AND CLAY
MINERALS**

THE CLAY MINERALS SOCIETY

Joseph W. Stucki, Series Editor and Editor in Chief
University of Illinois
Urbana, IL 61801-4798, USA

Lawrence F. Drummy, Volume Editor
US Air Force Research Laboratory
WPAFB, OH 45433-7901, USA

Contents

Chapter 1. Immobilization of organic dyes on clay minerals toward controlled photoinduced events.....1 by **MAKOTO OGAWA, MINORU SOHMIYA, NORISHIGE KAKEGAWA, and TOMOHIKO OKADA**

| | |
|--|----|
| 1. Introduction | 1 |
| 2. Organophilic clay minerals for immobilizing aromatic compounds | 4 |
| 3. Organically pillared clay minerals | 9 |
| 4. Intercalation of water-soluble polymers to control the spatial distribution of guests | 12 |
| 5. Conclusions | 16 |
| Acknowledgments | 17 |
| References..... | 17 |

Chapter 2. Inorganic heterostructured materials based on clay minerals21 by **PILAR ARANDA, CAROLINA BELVER, and EDUARDO RUIZ-HITZKY**

| | |
|---|----|
| 1. Introduction | 21 |
| 2. Pillared clays (PILCs) | 22 |
| 3. Porous clay heterostructures (PCHs)..... | 25 |
| 4. Delaminated porous clay heterostructures (DPCHs) | 27 |
| 5. Heterostructures based on fibrous clays | 30 |
| 6. Heterostructures based on the assembly of clay minerals and other inorganic solids | 33 |
| 7. Concluding remarks..... | 35 |
| Acknowledgments | 35 |
| References..... | 36 |

Chapter 3. Nanocomposite gels consisting of a unique polymer/clay network and their characteristics41 by **KAZUTOSHI HARAGUCHI**

| | |
|--|----|
| 1. Introduction | 41 |
| 2. Synthesis of NC gels | 43 |
| 2.1. Raw materials | 43 |
| 2.2. Synthesis procedures | 44 |
| 2.2.1. <i>In situ</i> free radical polymerization (aqueous redox system) | 44 |
| 2.2.2. <i>In situ</i> photopolymerization in an aqueous system..... | 44 |
| 2.3. Sample nomenclature | 44 |
| 3. Formation of NC gels | 45 |
| 4. Polymer/clay network structure | 47 |
| 5. Formation mechanism of polymer/clay network | 50 |

| | |
|---|----|
| 6. Mechanical properties of NC gels..... | 51 |
| 6.1. Comparisons of NC and OR gels..... | 51 |
| 6.1.1. NC gels | 51 |
| 6.1.2. OR gels | 51 |
| 6.2. Tensile properties of NC gels | 52 |
| 6.2.1. Effects of C_{clay} | 52 |
| 6.2.2. Fracture energy | 53 |
| 6.2.3. Recovery from high elongation..... | 54 |
| 6.3. Stress-strain curves in the second cycle..... | 55 |
| 6.4. Rubbery hydrogel | 57 |
| 6.5. Effect of clay mineral type..... | 57 |
| 6.6. Compressive properties | 58 |
| 7. Swelling properties of NC gels | 61 |
| 7.1. Effective cross-link densities | 61 |
| 8. Property changes at LCST | 63 |
| 8.1. Transparency changes at LCST | 63 |
| 8.2. Gel volume changes at LCST | 64 |
| 9. Dispersion morphology of clay platelets in NC gels | 65 |
| 9.1. Uniform dispersion of clay..... | 65 |
| 10. Various shapes and surface patterns | 66 |
| 11. Extended characteristics of NC gels | 68 |
| 11.1. Optical anisotropy and its changes | 68 |
| 11.2. Large water contact angles..... | 68 |
| 11.3. Further characteristics..... | 68 |
| 12. Concluding remarks..... | 70 |
| Acknowledgments | 71 |
| References..... | 71 |

Chapter 4. Melt-state viscoelastic properties of clay-containing polymer nanocomposites75

by SUPRAKAS SINHA RAY

| | |
|---|-----|
| 1. Introduction | 75 |
| 2. Structure and properties of clays..... | 77 |
| 3. Preparative methods | 78 |
| 4. Rheology | 79 |
| 4.1 Linear dynamic rheological properties | 80 |
| 4.2 Steady shear rheology | 101 |
| 4.3 Elongation flow rheology | 108 |
| 5. Summary | 111 |
| Acknowledgments | 112 |
| Abbreviations | 112 |
| References..... | 113 |
